

A complete range of products to help prolong the service life of chemical protective clothing and to ensure it is always ready for operational use

Citrikleen

A high quality citric based cleaner for the removal of heavy grease, oil and other petroleum type soil deposits

Maxwax

A lubricant for application to the outside of gas-tight zips to ensure free running. Essential for ease and quickness of dressing.

Fog Off

An excellent cleanser with anti-fogging and anti-misting properties designed for Respirex suit visors. It is anti-static and leaves no marks.

Synodor

Designed to be applied internally to chemical protective clothing to avoid micro fungal/bacterial infections and odour problems.
